

# Comparing Intellect RPW Systems

| INTELECT RPW  | INTELECT RPW 2   |
|---|--|
| Resistive touch screen<br>Slower processing , need recalibration, lower image quality | Capacitive touch screen<br>Very reactive, no calibration, higher image quality           |
| D-Actor hand piece : pressure range 1-5 BARS  | Falcon hand piece : Shorter and lighter better comfort. Pressure range 0.3-5 BARS        |
| Only D Actor transmitters   | Spine and Peri Actor transmitters for spine and fascial treatments                       |
| V Actor up to 35Hz  | V Actor HF up to 50Hz ( better to reduce muscle tone)                                    |
| Compressor 1 <sup>st</sup> generation<br>Larger in size, heavy , no condenser, louder | Compressor latest generation<br>more compact , less weight, less nosier...reduced noise. |
| No possibility to export treatment data   | Blue tooth export and import data (Not available at launch, to come with Software V2)    |
| No condenser: risk of humidity accumulation in the hand piece                         | New condenser implemented, removing humidity from the hand piece for longer life         |
| Space size: occupied surface 0,35 m <sup>2</sup>                                      | Space size: occupied surface 0,17 m <sup>2</sup> · Half the surface                      |
