EXOTIC & AVIAN | Hand-Held X-ray & Detector

A lightweight and powerful battery operated, portable X-ray system that produces superior image quality. Designed for simplicity and ease of use, it is ideal for imaging exotic and avian animals.

Detector features

- Removable handle
- Support Cloud system
- Wireless
- Auto image rotation
- Sleep mode
- Light weight durable design
- Built-in image storage
- Shock sensor

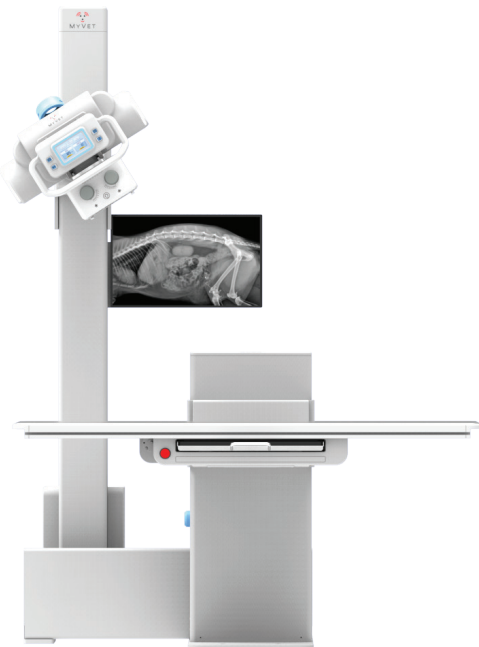

MYVET TABLE | for Small Animals

The MyVet table system is a revolutionary Veterinary Elevating X-Ray Table which delivers silent elevating to fulfill comfort and stability.

The MyVet table system is a cost effective, workflow efficient approach to digital radiographic imaging designed to improve patient workflow in veterinary practice of small animals.

- Completely Silent Elevating Table system
- Lowers to 10.5 inches off the floor
- Vertical 40 inches and 72 inches SID
- Horizontal Beam at 72 inches SID
- 17x17 Csl Flat Panel Detector
- Gives you the ability to do weight bearing exams
- Easy table operation by a foot switch
- Charging Bucky

VET DENTAL | Intra-Oral Imaging System

Our Intra-oral imaging system is the ideal veterinary digital imaging solution. It provides higher diagnostic value with superior image quality for precise and advanced intra-oral radiography.

• Intra-Oral Sensor | HDI-2000

• Wall Mount X-Ray | EzRay

BOVINE & ZOO | DR Portable System

The Rayence portable package provides the ultimate in adaptability to its environment. The 1417 Series flat panel detector is the latest in innovative flat panel technology. The durable, ultra-thin and light weight design makes it the most ideal 14"x17" flat panel detector.

• Standard Equipment

Standard Equipment

- 1417 DR flat panel detector
- Laptop computer with pre-installed VetView software
- Portable carrying case with wheels
- Rechargeable 2-battery pack with a charger

Optional Equipment

- Portable generator
- Tablet PC
- Mobile battery charger

EQUINE PACKAGE | DR Portable System

The DR portable package for equine provides the ultimate in adaptability to its environment. It uses auto-trigger signal sensing technology that does not require any integration into an X-ray generator.

Standard Equipment

- 1012 DR flat panel detector
- Laptop computer with pre-installed VetView software
- Portable carrying case with wheels
- Rechargeable 2-battery pack with a charger

Optional Equipment

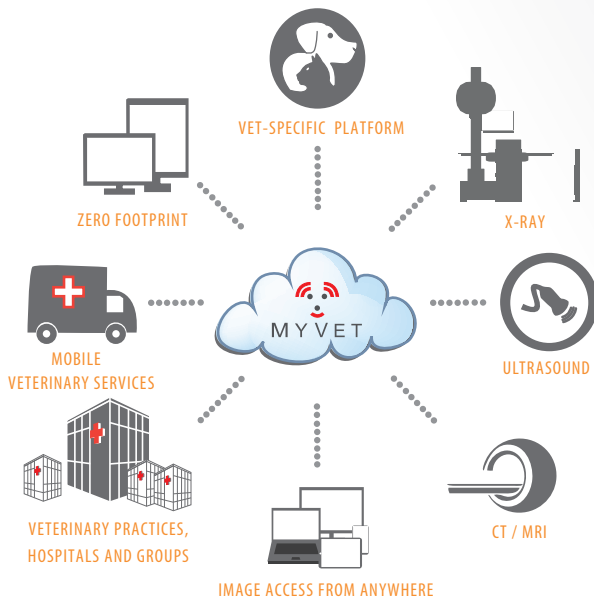

- Portable generator
- 14"x17" DR panel
- Tablet PC
- Mobile battery charger

Mobile battery charger
Tablet PC
