

ORFILIGHT™

**A touch
of lightness**

ORFILIGHT™

ORFILIGHT™ is lighter than water which makes it most comfortable. It weighs 15 to 30 % less than various other splinting materials.

This weight reduction has a beneficial therapeutic effect making ORFILIGHT™ simply the best material for a whole range of splinting applications.

The reduced density of the polymer results in a soft surface giving it a pleasant moulding sensation and making it gentle to the skin.

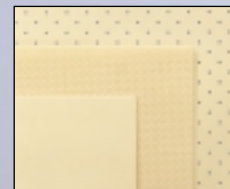

ORFILIGHT™ has the benefits of our famous ORFIT® Classic splinting material, plus a number of extra features:

- Low activation temperature for a fully controlled and easy moulding.
- High mouldability, for splints with high wearing comfort.
- Self-adhesive for reliable bonding and easy fixation of accessories.
- No need for solvents.
- Gentle memory for a perfect fit and remouldability. No fingerprints.
- Low shrinkage while cooling, resulting in a stable shape and dimensions.
- Self-sealing edges for an excellent finishing.
- Waterproof and suitable for bathing or swimming.
- Discrete skin colour.
- Perfect skin ventilation through perforations.
- Available in sheets and pre-cut forms.
- 3 thicknesses, 2 perforation types, selected for the most suitable solution.
- X-ray translucent for control of efficiency and evolution.

ORFILIGHT™, high comfort for patient and user.

SHEET MATERIALS

	Art. no.
450 x 600 x 1,6 mm micro perforated	8332.2/L
450 x 600 x 2,5 mm micro perforated	8338.2/L
450 x 600 x 3,2 mm non perforated	8334.1/L
450 x 600 x 3,2 mm mini perforated	8334.4/L

PRE-CUTS

Flexor tendon gliding splint

S	35843/L
M	35844/L
L	35845/L

Thumb post splint

S	35810/L
M	35811/L
L	35812/L

Dorsal wrist cock-up splint

XS	35818/L
S	35820/L
M	35821/L
L	35822/L

European and US patents apply.
